EDUCATION

NC State University, Raleigh, North Carolina

Aug 2024 - Expected May 2026

Masters of Computer Science

Coursework - Design and Analysis of Algorithms, Software Engineering, Software Security, Database Management Systems, Automated Learning and Data Analysis, Neural Networks

Maulana Abul Kalam Azad University of Technology, Kolkata, India

Aug 2016 - July 2020

Bachelor of Technology in Electronics and Communication Engineering

Coursework - Data Structures and Algorithms, Database Management Systems, Object Oriented Programming

SKILLS

Frontend Development - Javascript, AngularJS, ReactJS, Customtkinter, HTML/CSS, Tailwind CSS

Backend Development - Python, Django, Java, Spring Boot, REST APIs, C, C++

Testing - JUnit, Jest, Selenium Cucumber, RestAssured, Jasmine, JAWS, Wave

Others - MySQL, PostgreSQL, Docker, Linux/Unix, PyTorch, Tomcat, Tensorflow, Kafka, RabbitMQ, AWS

Certifications - Meta Backend Developer Certificate, Coursera

WORK EXPERIENCE

Software Engineer, LTIMindtree, Bengaluru, India

June 2022 - July 2024

- Developed the UI for an e-communication framework using ReactJS to generate paperless billing notifications for insurance premiums.
- Incorporated global paperless preference toggle for multiple accounts on user interface leading to 80% decrease in bills sent by US Mail.
- Added readable tooltips and tested via JAWS and WAVE tools to make application 100% ADA compliant.

Software Development Engineer in Test, Mindtree, Bengaluru, India

April 2021 - May 2022

- Developed complete selenium testing framework for online fund management application
- Created API automation framework for epayment application using Selenium and RESTAssured.

PROJECTS

- **Django/Javascript/Machine Learning** - SimplyClip is a chrome extension for students and professors to save important items that have been read and export via different options
- **Django/Javascript** - CityBytes is a website which gives recommendations and exciting information about a location to a tourist or even provides residential options to users who have moved to a new town after considering factors like climate and education options.
- **Java/SpringBoot** - Shopping cart application with Spring Security and JWT
- **Java/SpringBoot** - Food delivery application with Stripe integration
- **C** - Multithreaded Proxy Webserver
- **Machine Learning** - Built a medical diagnosis system leveraging multiple datasets on prevalent diseases such as diabetes, heart disease, thyroid dysfunction and chronic kidney disease to give comprehensive diagnoses on tests results.
- **Image Processing/Tensorflow** - Built a skin disease diagnosis system to integrate into larger medical diagnosis system.
- **Machine Learning** - Podcast Summarization Web Application
